EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Robert Ballarini on September 8, 2008.

The application has been amended as follows:

Claim 1 (Currently amended). A drawer guide rail assembly mounted for a guided and stabilized in and out movement with respect to a furniture member comprising:

a fixed guide for attachment to an inner sidewall of said furniture member and having at least one running surface;

an intermediate pull out channel capable of sliding back and forth relative to said fixed guide on said running surface of said fixed guide, an upper surface of said intermediate pull out channel section providing a second running surface;

a first roller bearing positioned within said intermediate pull out channel for enabling sliding movement of said intermediate pull out channel on said fixed guide;

an outer pull out channel for attachment to an undersurface of a drawer capable of sliding back and forth on said intermediate pull out channel relative to said intermediate pull out channel; and

a second roller bearing positioned within said outer pull out channel for enabling sliding movement of said outer pull out channel on said intermediate pull out channel, said second roller bearing including roller bodies within a receptacle; wherein said fixed guide running surface is a T-shaped flange extending upwards; said drawer guide rail assembly further comprises a stabilizer positioned between said intermediate pull out channel and said outer pull out channel; said stabilizer is mounted on top of the intermediate pull out channel, and includes a shoulder which is horizontally extended from each side of said stabilizer to be fitted with said second roller bearing for guiding and stabilizing the movements of said outer pull out channel relative to said intermediate pull out channel; and the second roller bearing is disposed over the stabilizer.

Drawings

2. The proposed replacement sheet of drawings was received on June 17, 2008. The drawings have been approved for examination purposes by the examiner.
